

We are looking for an inspiring building for The Hub Lausanne

Why a building is Key to increasing social entrepreneurship

We have envisioned a HUB that brings people together in a way that catalyzes change for the better - socially and environmentally. A space that attracts an eclectic mix of entrepreneurs, change agents and activists who, in coming together, spark new ideas, create energy and projects, and make our community a thriving place to live and work. To create this, we need a home - to work in, meet, share ideas, brainstorm and feel inspired.

Creating the kind of place you would like to work in

We are meeting with architects and designers who have helped design spaces that inspire creativity and productivity. The idea is you come, you get inspired and energized, you apply yourself with vigor, and you go home satisfied. Hit a hurdle? You can turn to others to figure out how to address your issue and even how to solve it. You don't waste time and energy feeling overwhelmed.

The difference a good place makes

You know how you go into some restaurants and they are buzzy and give you energy, and make you want to come back? We want to create that kind of animated place for working. It's a model that has worked in London, Milan, Zurich, Amsterdam, Toronto, etc. A good space, well laid out invites. And a good invitation creates possibilities.

What you can most usefully do

Send us details on buildings including where they are, who to contact and even why you think its a great place. Or, names of developers and architects you know who are interested in social entrepreneurship in Lausanne/Suisse Romande, who can help us access buildings.

Thanks for helping us build a HUB for Lausanne,

Simon, Rajiv, Olivier, Gilles, Caroline
